

## Planmeca PlanScan Intraoral Scanning System

The Planmeca PlanScan Intraoral Scanner and PlanCAD Design software driven by E4D Technologies enhances the ease-of-use in digital dental restorations for the benefit of the patient and the practitioner. The solid-state Planmeca PlanScan employs blue laser technology, which offers an improved ability to capture the fine details that allow for more precise and accurate prosthetics. It also incorporates many other advances to ensure an exceptional intraoral scanning experience. These include fog-free scanning, ergonomic design for easy positioning, removable tips for infection control, active heat dissipation for full arch scanning, color-coded feedback to operator, and adjustable field of view.

The laptop-based Planmeca PlanCAD Design Center gives the practitioner increased flexibility and portability. It is easily moved from operator to operator, or even among multiple offices, all while wirelessly connected to the milling center for maximum productivity and patient service.
