

## New Scanner Tips for a Comfortable Patient Experience

PlanScan tips are now available in three sizes: a standard tip and two slimmer profiled tips for better access or with patients with small mouths. All tips feature a smooth finish to easily glide between cheeks and gums. Each is ergonomically designed ensuring a pleasant patient experience and comfortable scanning position for the practice team.

- Standard tips are great for general scanning procedures and larger field of view. 3 are packaged with each PlanScan scanner.
- Small Portrait is ideal for patients with smaller mouths; for enhanced reach to the posterior, compromised dentition, or for capturing interproximal areas.
- Small Landscape is ideal for anterior scanning (buccal to lingual; saddle scanning) and easy capture of buccal bite.
- Removable tips so that there is no down time between patients.
- Autoclavable for efficient and effective sterilization.
- New Smart tips feature built-in diagnostics.
- Compatible with PlanCAD version 5.5 or later.
